

**LYMECLEAR**<sup>®</sup>  
WITH BIORESONANCE

**LYMECLEAR**<sup>®</sup> is a unique, 2-Part, individualized, healing program, designed to rapidly clear Lyme Disease, co-infections and parasites, and restore the body's defences

---

Chronic Lyme Disease sufferers have been to countless doctors, tried numerous treatments, miracle cures, devices, antibiotics, or prescription medications, only to end up depressed, bankrupt and still sick. Those attempting to heal themselves, fail because they do not have the tools, knowledge and experience to succeed.

By clearing infection, reversing the conditions which contributed to your illness, and repairing damage caused, the **LYMECLEAR**<sup>®</sup> program quickly and safely restores health, saving further suffering and expenditure.

**LYMECLEAR**<sup>®</sup> is a step-by-step, structured program. Developed, in response to the failure of conventional solutions to bring about healing.

**Part I** ('Kill' phase) - clears toxicity, waste and invading organisms, in 80% of sufferers, within 7 days.

**Part II** ('Healing' phase) - resolves inflammation, repairs the gut, rebuilds the immune system and strengthens digestion. It has 7 Steps.

# The LYMECLEAR® Program

## PART I

### Clear Infections

Days 1-3	Detox and Intestinal cleansing
Days 4-5	Clear Lyme, Giardia, worms, bacteria and fungal infections
Days 6-7	Clear Mycoplasmas and remaining infections

## PART II

### Heal the Gut, Digestion and Immune System

- Resolve Inflammation
- Heal 'leaky gut' and stunted micro-villi
- Restore enzyme production
- Re-balance gut flora (beneficial bacteria)
- Address nutritional deficiencies
- Restore digestive power
- Repair damage caused by long-term infection<sup>3</sup>

### What is Included?

- ✓ Parts I and II of the LYMECLEAR® program
- ✓ 120 minutes of online support
- ✓ 2 Bioresonance Devices

LYMECLEAR® is available as an Online Consultation or Residential Retreat

## REQUIREMENTS

To run the Bioresonance software you will need:

- A laptop or desktop PC, running Microsoft Windows 8 or higher
- At least 2 USB ports + USB adaptor
- Internet connection

There is no mobile phone option

---

## PROGRAM COST

**LYMECLEAR®** program + 120 minutes online support - **US\$598**

Two Bioresonance devices - **\$499 + \$225**

Total = **\$1322**

(If you are local, please discuss pricing and program with me, separately)

---

Once payment is received, I send the complete protocol, order the devices and have them shipped to you. No need to worry if you aren't a 'techie'. I help you set up, too!

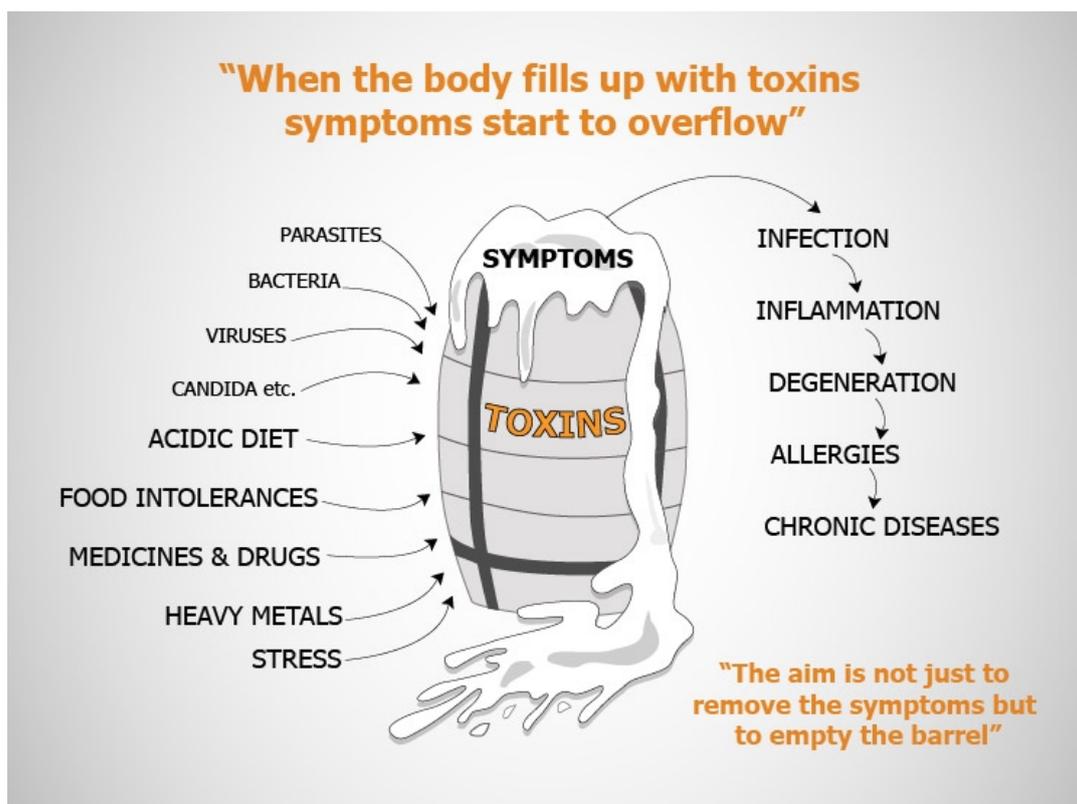

NOTE: Previous clients may be willing to loan their devices, or sell to you at a discount. Contact me for details.

## Why is a Program Like This Necessary?

We all want to just take a pill (or herb) and get better. It's cheap and quick and this is what we have been conditioned, since birth, to expect. Unfortunately, it doesn't work with chronic Lyme Disease. Long-term medication may manage pathogen load but it doesn't restore health.

What makes a healthy person? In simple terms, we are made up of a bunch of cells and 2 fluids. The liver.. a bunch of cells and 2 fluids. Kidneys, eyes, skin, brain.. a bunch of cells and 2 fluids. One fluid is blood. The other is lymph. Blood supplies nutrients to the cells. Lymph takes away the trash. Food in. Waste out. It's that simple.

In a healthy body, cells are perfectly-round, swimming in clean, oxygenated, nutrient-rich fluid, with a balanced PH, free of toxins and microbes. Given the right nutrients, healthy cell DNA replicates new healthy cells. Cells communicate information to each other, electrically, without interference. In a healthy body, stomach acid and gut bacteria (the immune system) destroy invaders. There is no sickness.

In an unhealthy body, the immune system is depressed and stomach acid, weak. The lymphatic system (body's waste disposal system) becomes backed-up with metabolic and other wastes, our tissues are overly acidic, and we are deficient in vital nutrients. Cells are swimming in a toxic 'soup'. Cell DNA replicates unhealthy cells. A **"PARASITES WELCOME"** sign hangs around our neck.

This toxic, deficient, 'soup' over time, fills up, until it eventually overflows. It is like having a backed-up septic tank, in your home, overflowing into the kitchen. The whole house stinks.

Parasites, worms, fungi and pathogens, overcome our defences, establishing colonies, in the gut and elsewhere, where they feed on wastes, compete for nutrients, create biofilms (to hide behind), alter our gut bacteria to their liking, trigger inflammation, and produce toxic waste products, adding to the overall body burden. Our inflamed gut becomes 'leaky'. Fungal and bacterial overgrowth damages cells, organs and tissues, causing a host of chronic, degenerative disorders.

How is an antibiotic, herb, or 3 minutes with a Doctor, going to fix all that? It can't.

This is the key to getting well. You not only need to clear invaders but also **correct the conditions which caused you to get sick**. Most practitioners and sufferers are only doing the former, which is why they don't get results and you are reading this.

### **"Grasshopper Medicine"**

I call it "Grasshopper Medicine". Like a grasshopper, we spend years, hopping from supplement to supplement, therapy to therapy, practitioner to practitioner. Trying to fix our diseases, with an assortment of over-hyped and expensive solutions... probiotics, Ozone, Vit C infusions, colonics and enemas, hyperbaric oxygen, gizmos with flashing lights, Rife machines and many more. Hop, hop, hop, hop. We see a steady progression of naturopaths, listen to 'experts', in Facebook groups, who haven't fixed themselves. Our medicine cabinet is filled with half-used or unopened supplements. After years of this, we are left confused, demoralized, still sick and broke.

It's somewhat ironic **we spend a fortune, trying to save money**.

### **"All Disease Begins in the Gut"**

I know what it's like. I was the King of Grasshoppers, spending 30 years with chronic Lyme (misdiagnosed), until bioresonance revealed the true cause of all my ailments. By that point I could barely climb a flight of stairs. My joints hurt, my whole body was in pain, my mind was an anxiety-filled mess, I was emaciated due to malabsorption, constantly exhausted, and my arteries were being chewed up by inflammation. A long list of progressively worsening disorders were leading me to an inevitable and painful end.

That these small invaders can cause so much damage, is a surprise to people. It shouldn't be. We were told, thousands of years ago, by one of the greatest healers of all time, Hippocrates.

"All Disease Begins in the Gut".

## Reasons **Lyme Disease** Remedies Fail

- Uneducated Doctors and Practitioners
- Parasitic resistance to pharmaceuticals
- Ineffective or inadequate solutions
- Individual genetic differences
- Attacking symptoms and not underlying cause
- Toxicity - "You cannot heal a dirty body"
- Hyper-sensitivity to 'Die-off'
- Co-infections
- Biofilms
- Weak stomach acid
- Damaged intestinal lining ('Leaky Gut')
- Depressed immune system
- Complex issues
- Adverse reactions to supplements or therapies
- Lack of technical and emotional support
- Poor compliance (we don't fully follow the program, or we cheat!)
- Lack of funds

## Reasons **LYMECLEAR®** Succeeds

- Step-by-step, comprehensive protocol
- individualized
- Holistic
- Detoxification
- Effective antimicrobials
- Managed 'Die-off'
- Gut and Immune System repair
- Nutritional re-balancing
- Bioresonance testing, monitoring and therapy
- Technical and emotional support
- It's affordable

## Does it Work?

80% of chronic sufferers clear infections, within 7 days. 15% need more time. 5% will fail, for various reasons. Everyone experiences improved health.

If you have suffered for years, you may think it impossible to clear infections, in only 7 days. Yet, Bioresonance scans show that is exactly what occurs. You run a scan, identify the pathogen, apply the protocol, then SEE it has gone.

The following have been reported cleared by those following the program: Borrelia, Bartonella, Mycoplasmas, Babesia, Anaplasma, Ehrlichia, Candida, Chlamydia, Giardia, mold, worms and Fasciola (liver flukes).

## Barriers to Healing

Biofilms, parasites, low vitality, systemic toxicity, chronic conditions, genetics, nutrient deficiencies, food sensitivities, inflammation, toxic stress and unresolved trauma. All can block healing. During the program we identify barriers and remove them.

## “Die-off” or Herxheimer Reaction

“Die-off” is where parasites, fungi and bacteria, killed in the body, release chemicals, such as ammonia, which can make us feel unwell. Some people are highly sensitive to ‘die-off’, or immune reactions. Programs include steps to limit these effects. Most clients experience none (or very little) on the **LYMECLEAR®** program.

## Giardia<sup>3</sup>

Very few people have heard of *Giardia Lamblia* or *Lambliia Intestinalis* yet it is the number 1 protozoan parasite, worldwide and a major cause of chronic disease, with symptoms similar to Lyme Disease. Because standard stool tests easily miss it, practitioners do not look for it and you do not get well. Bioresonance scans indicate Giardia infects 20-30% of Lyme sufferers, and may be the primary cause of their symptoms. Its effect on immune and gut health is so [profound](#) it can block recovery.

## Fasting

While it is possible to clear parasites and other infections while still eating, Fasting **DOUBLES** your chances of success. Or, put another way... if you eat, you **HALVE** your chances of success.

Fasting has been used for thousands of years to bring about healing. Animals, when sick, instinctively stop eating and seek out clay, herbs, or green leaves (chlorophyll). By not eating, the body's vitality, previously taken up with consuming, digesting and eliminating, is now fully available for cleansing, healing and regeneration, all of which occur, at an accelerated pace. The combination, of fasting and cleansing, is exceptional in reversing chronic disease.

When fasting, you are starving parasites of food. This is why I exclude most supplements, during **Part I**, as they can act as a food source for invaders.

Fasting is most effective when the body is properly hydrated. Imagine a dirty sponge, left overnight in a bucket of water. In the morning, the sponge is clean and the dirt is laying at the bottom of the bucket. Our bodies are the same. Clean water is a solvent. It hydrates and lifts waste out of the lymphatic tissues, then moves it toward the channels of elimination (lungs, skin, kidneys and colon). If you don't drink sufficient fluid, this 'dirt' cannot 'lift' off. The right fruits and vegetable juices can also hydrate, alkalyze, 'scrub' and cleanse.

Additional therapies help with detoxification, elimination and 'die-off' reactions.

## Eating

If you cannot Fast, eating is allowed. However, clearance will take longer than 7 days, and if inflammation and food sensitivities exist, diets need to be individually tailored. FODMAPS and similar diets are helpful but Bioresonance **Food Sensitivity Testing** will more accurately identify what foods and substances you are reacting to and need to eliminate.

## Bioresonance

If you cannot Fast, eating is allowed. However, clearance will take longer and success, less likely. If inflammation and food sensitivities are present, diets need to be individually tailored. FODMAPS and similar diets are helpful. However, Bioresonance **Food Sensitivity Testing** will more accurately identify what foods and substances you are reacting to.

## Bioresonance

Bioresonance is 21<sup>st</sup> century medicine. It is a crucial and remarkable tool, without which I, and many of my clients, would still be sick. Bioresonance is based on the concept everything in nature has its own unique, resonant frequency. A bit like the old wireless Radio Stations have their own reserved radio frequency.

Over the last 100 years, Doctors, Scientists and researchers have identified thousands of these frequencies:- Plants, minerals, vitamins, parasites, organs, healthy and unhealthy cells, hormones, even our emotions. Then programmed them into computerised devices. These can scan the body for weakened cells and energetically correct them, restoring proper cell-to-cell communication.

While no testing is perfect, Bioresonance is so remarkable, I regard it as indispensable to restoring health, especially gut health.

With the program, you receive two bioresonance devices. One provides a total picture of imbalances, conditions and infections, where in the body they are located, and Stage. It identifies around 140 different bacteria, fungi, viruses and parasites\*. It is used to identify food sensitivities, nutrient deficiencies, and which herbs, supplements, or remedies, are most likely to restore balance.

The other provides 39 different reports including: mineral, vitamin, amino acids, fats, blood sugar, prostate, chemical and metal toxicity, and status of the major systems of the body.

Systems which provide all this information, in one unit, are too expensive.

\*There are hundreds of strains of parasites and pathogens for which tests do not yet exist. Where not clearly identified, infection can be deduced from symptoms.

Sample Bioresonance reports can be found on my [Lyme Disease](#) and [Lyme Disease Retreat](#) pages.

### **Can I Just Run Tests via my Doctor?**

You can. Only, trying to obtain the equivalent information Bioresonance testing gives you, would cost thousands of dollars, from multiple providers + the cost of Doctor visits, even if you could find such tests. Full panel Lyme testing costs hundreds of dollars and false readings can lead to unnecessary and expensive treatments.

For example, a hair mineral analysis test, via a naturopath, costs US\$100-\$125. You send off a clip of hair, then wait for results. Let's say it reports deficiencies. You supplement, then test again, to ensure levels have recovered. That's two tests x \$125 = \$250 + the cost of the Doctor visit + travel. This is more than the cost of the bioresonance device. Mineral Status is just 1 of 39 reports it generates.

By having your own device, I can dial-in and test you, at home. You can run multiple tests, as often as you wish, get fantastically useful data + save the cost of conventional testing and Doctor visits.

## **Can I Do the Program Without Bioresonance?**

Yes, of course. However, I cannot guarantee you will get well. Most Doctors and practitioners are effectively 'flying blind'. Without bioresonance they rely on symptoms so have less idea what is really wrong. How do they know if a supplement or herb is working? If a parasite or pathogen has been cleared? What foods and substances you are sensitive to? If your inflammation has resolved? When your gut is healed? If your Iron or Zinc or B12 are back to normal? Your immune system is fixed? Bioresonance answers all these questions, eliminating the guesswork.

## **Recovering Costs**

In the fight to get well, it is easy to exhaust all our savings. The **LYMECLEAR®** program provides the opportunity to recover your costs, and generate additional income, by unlocking some of the value of the bioresonance devices. You can also sell them on, after the program. Additionally, you can make referrals and gain time credits for your own consultations.

## **Support Group**

To make it easier for me to disseminate important information and support each other, clients are automatically added to my private FB Support group.

## **Supplements**

Many practitioners load you up with supplements, costing US\$300-\$1000 per month for which they receive large commissions (e.g. Metagenics). I do not sell supplements nor am I affiliated with any supplement suppliers. This allows me to recommend what I consider the best products for you, at the best prices. You may go with my suggestions, or incorporate your own (most 'Lymies' have a cupboard-full of supplements), Buhner, Cowden, etc..

## **Why 120 minutes?**

120 minutes is the minimum time needed for me to conduct assessments, dial-in and set up the Bioresonance devices, run scans, provide support, basic training and education, present findings and answer questions. It is based on everything running smoothly. i.e. Problem-free installation of devices and success of each healing phase.

While you receive 120 minutes, online, I need 4 hours more, offline, to analyze scan results and other data, customize and write up your program.

If it becomes clear 120 minutes isn't sufficient, you will be asked to purchase more time.

## How Long Does It Take To Heal?

**Part I** produces 90% improvement, in 80% of clients, within 7 days. **Part II** can take anywhere from 6-12 weeks\*. Clients with more complex issues such as Histamine intolerance, SIBO, MTHFR and more, may need longer to heal. We respond at different rates, making estimates difficult.

## Retreats

Online programs are affordable and work well. Yet, nothing can beat a one-on-one, customized program, at a Residential Retreat. Especially, if you are heading into a frozen northern winter. You receive high quality accommodation, 24x7 focus, support and attention, away from temptation and negativity, in a climate and location, conducive to healing, with all the tools, skills and experience, available on-site. Learn more about residential Retreats, [here](#).

## Getting Started

If you are ready to get started with your Lyme Disease Consultation, contact me now via [Messenger](#) or [email](#). I will respond immediately, if free. Or within 24 hours, if not.

Additional information can be found on the [Wellnesspaul](#) website and [FAQ](#) page.

## DISCLAIMER

I am not a Doctor and do not prescribe 'medicines' nor do I treat 'patients'. There is no 'Doctor-Patient' relationship. I do not 'cure' anyone. I help you create conditions which allow the body to heal itself, in a safe and supportive environment. Any action you take related to health and wellness, based on the information presented by me, within this document, on the WellnessPaul website, or within my books, blogs, videos or writings, is your sole responsibility and you act of your own volition and in consultation with a fully-licenced practitioner.

Information provided within this document is readily available in the public domain. All herbs, supplements and Lyme protocols mentioned are already in use by medical and/or integrative Doctors. If any therapy, herb, supplement or technique is banned in your own country, please abide by your local laws.

Bioresonance devices may not be approved by the medical authorities in your country and there is controversy surrounding their use. You are therefore urged to conduct your own research. Any test results produced by Bioresonance prior to, during, or after the program, are for reference purposes only and not to be considered medical diagnoses.

---

## SHARING THE LYMECLEAR PROGRAM

While I understand the desire to help others and save money, the LYMECLEAR protocol is only intended for those working directly with me ('WellnessPaul'). It is not to be shared, in any form, without my express authorisation.

Healing is individual, complex and serious. What works for one person may not work for another. Protocols often need to be adjusted, during programs. Without experienced guidance, failure can result and harm caused, hurting my reputation and that of the program.

By all means, inform others the program exists. However, it is better to refer, or link, them to me.

Thank you.
